

*Bespoke Kitchen islands

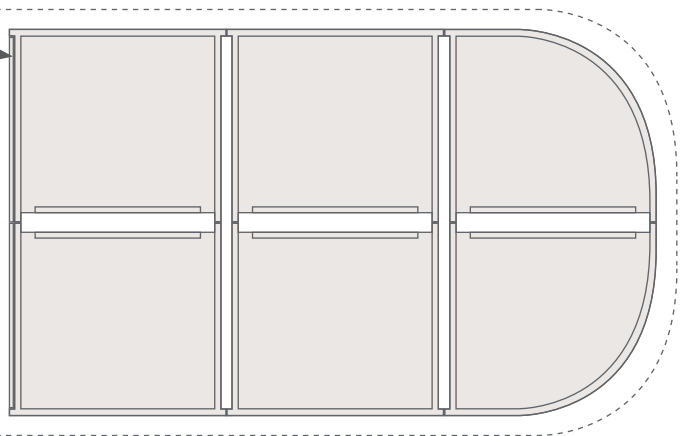

We offer a freestanding kitchen island, that is very popular, but for some people it is just not quite big enough. If you fancy something larger and more unique, we can design you an island in any configuration you could wish for. Using our standard base cabinets positioned back to back and either our curved cabinets or 360 island end, at each end, we can design you a fully functional island on every side. It is then possible to template your worktop to fit the island exactly, or have an overhang, wherever you wish, in order to create a breakfast bar. The options are endless to create the most unique focal point of your choice.
